

AI - BASED SYMPTOM CHECKER

For Common Diseases

Problem Statement:

- Early detection of diseases.
- Limited access to healthcare professionals.

Data Set:

- Title: Symptom-Disease Association Dataset
- Source: National Health Portal of India

Algorithm:

- Decision Trees and Random Forests (Scikit-learn)

Tools:

- Python
- Scikit-learn
- Pandas, NumPy
- Matplotlib, Seaborn

Expected Outcome:

- Functional symptom checker
- User-friendly interface
- Insights into symptom-disease relationships
